

Innovative Solutions

*At MMC, we source efficiently, manage effectively,
and retain the best.*

Workforce Management Solutions

MMC provides technical and non-technical staff augmentation services nationwide for short and long-term assignments. We provide comprehensive workforce solutions to support the needs of our clients at every stage of program, product, or business lifecycle development.

MMC has performed as a long-term Tier I supplier to several Fortune 500 and public sector clients nationwide. We routinely provide more than 2,000 technical and non-technical resources to our clients annually, including payrolled employees.

As a comprehensive workforce management solutions provider, MMC provides far more than basic staff augmentation services. We provide customized, client-focused workforce management solutions that routinely include: contingent workforce acquisition, direct placement, human resource outsourcing, Independent Contractor Programs, professional payrolling, and recruitment process outsourcing.

MMC has strong, well documented recruiting processes and standards that are used to identify, screen, and qualify all personnel. We utilize well-established channels for accessing staff resources and proven methods for staff recruitment, including the ability to customize reports to fit client requirements.

Our ability to quickly and efficiently understand, communicate, implement, and monitor your requirements ultimately decreases administrative costs and contributes to our success in providing the best services, at the best price, in a timely and cost effective manner.

MMC's proprietary Employee Management System (EMS) allows our recruiting team to enter, track, and submit candidates electronically for client consideration and interviews. Because the application is web-based through a secure connection, it provides employee/client access 24 hours a day, 7 days a week with confidential information sharing.
